

IN AN EMERGENCY

CALL OFFICE FROM MOBILE OR SAT PHONE

Lifeboat Medevac (Rescue)
Red Sea (0122 235 1313)

Primary Care

1. Open airway, check if the victim breathing or not?
2. If the victim breathing give 100% oxygen either with demand valve or free flow mask depending on the situation.
3. Put the victim in a recovery position

CPR

If the victim is not breathing perform CPR
Give 2 rescue breathes followed by 30 compressions and keep repeating the cycle until the victim begins breathing

Use an AED if available

Have the following details ready

- ✓ Guest name & age
- ✓ Nature & time of incident
- ✓ Dive Profile
- ✓ Where you are located
- ✓ What first aid has been given

Once the rescue arrives give them the victim & inform your manager & the office to follow up with the medical facility on land.
